PROSIDE®
Vinyl Siding

General Description: PROSIDE offers a lifetime of performance, beauty and low maintenance. Innovative features manufactured into this high-quality vinyl siding add up to a sound investment in home value:

- TruColor® Protection Technology provides superior color retention performance.
- Elegant low-gloss finish and enhanced shadow lines create the look of real wood.

Prosise is appropriate for use in new construction exteriors, remodeling projects or as replacement siding for existing structures, including residential and light commercial applications.

Colors: Prosise siding profiles come in a wide range of appealing colors. All colors are Spectrophotometer controlled.

Proside Single 8" is available in white only.

Lock: Prosise’s Posilok locking system holds panels securely, while allowing expansion and contraction in changing temperatures. The rigid shape and engineered locking leg provide a positive snap fit application and strong wind resistance. Lock is optically measured and controlled.

Accessories: Vytec manufactures a range of siding accessories which are compatible with Proside siding styles and colors. Accessory products include installation components, soffit, window and door trim, and corner systems.

Composition: Prosise siding products are produced using a custom-formulated PVC resin. This resin is produced exclusively for Vytec to maintain the high quality of its siding products.

Technical Data: Prosise siding is in compliance with ASTM specification for Rigid Polyvinyl Chloride (PVC) Siding Insulated Vinyl Siding D 3679, and the requirements of section R703.11 of the International Residential Code, and section 1404.14 of the International Building Code. Prosise siding meets or exceeds the properties noted in Table 1.

Important Fire Safety Information: When rigid vinyl siding is exposed to significant heat or flame, the vinyl will soften, sag, melt or burn, and may thereby expose material underneath. Care must be exercised when selecting underlayment materials because many underlayment materials are made from organic materials that are combustible. You should ascertain
the fire properties of underlayment materials prior to installation. All materials should be installed in accordance with local, state and federal Building Code and fire regulations.

**Wind Load Testing:** Vytec Prosid has been tested per ASTM D 5206 standard test method for resistance to negative wind load pressures exceeding 38 psf, which equates to more than 171 mph (V\text{ASD}) and 220mph (V\text{ULT}) when installed with nails positioned 16” on center. Check with your local building inspector for wind load requirements in your area on the type of structure you are building.

**Documents:** Vytec Vinyl Siding meets the requirements of the following specification:
- Conforms to ASTM Specification D3679
- ICC-ES Evaluation Report ESR-1066
- Florida BCIS Approval FL 12483
- Texas Department of Insurance Product Evaluation EC-11
- For specific product evaluation/approval information, call 800-265-2230.

**Installation:** Prior to commencing work, verify governing dimensions of building, examine, clean and repair, if necessary, any adjoining work on which the siding is in any way dependent for its proper installation. Sheathing materials must have an acceptable working surface. Siding, soffit and accessories shall be installed in accordance with the Vinyl Siding Institute (VSI) Installation Instructions available at [www.vinylsiding.org](http://www.vinylsiding.org).

**Warranty:** Vytec supports Prosid siding products with a Lifetime Limited Warranty to the original homeowner. The product warranty is transferable if the home is sold.

**Sample Short Form Specification:** Siding as shown on drawings or specified herein shall be Prosid® Vinyl Siding as manufactured by Vytec, Malvern, PA. The siding shall have a .042” nominal thickness. (Single 8” profile is .045” nominal thickness) Installation shall be in accordance with manufacturer’s instructions.

**Three-part Format Specifications:** Long form specifications in three-part format are available on the Vytec website at [www.vytec.com](http://www.vytec.com).
