# SHAKES

## THE DIFFERENCE IS IN THE DETAILS

Beautiful, Elegant and Tough

Turning a house into a home is all about the details. Vytex Shakes allow you to design an exterior that reflects your sense of style, to accent a dormer or to cover a whole house, while providing virtually maintenance-free performance and durability.

### \*Expressions® Colors – Express Yourself with Bold Color!

This rich, bold palette of deep colors that give your home a striking new look.

### Tips for choosing siding colors

- Light colors to make your home look larger.
- Darker colors for a more dramatic exterior look.
- Lighter wall color with a darker accent color to call attention to details like dormers.
- Choose a siding that complements your roof color.

# THE ANATOMY OF SHAKES

Not all shakes are created equal

**Exclusive nail hem** simplifies installation because no center nail is needed

**.085" Extra-thick panel** made of an injection molded composite polymer for superior strength and rigidity.

**Unique continuous lock** holds panels snug and secure the wall.

**Low gloss woodgrain** looks like hand-crafted rough cedar.

**9/16" Deep, realistic panel projection** creates enhanced shadow lines.

**Random patterns and varying gaps** in the panel design hide seams.

## Vytec Shakes profile:

Single 7"  
Traditional Shake

**81-1/4" Long, single-course structure** looks more natural on the wall and minimizes installation waste.

## Vytec Shakes Specifications:

### Certificate of Conformance

This certificate of conformance is provided to assist the architect or specifier of Shakes. This siding is intended solely for the sidewall applications for new construction exteriors, remodeling projects or as replacement siding for existing structures, including residential and light commercial applications.

### Product Specifications

Vytec Shakes siding is made from single-source injection-molded polypropylene. Products conform to various ASTM D7254 and other ASTM standards. The product is produced under an ISO 9001-200 Quality Management System to assure consistent product properties.

### Material Properties

Tensile strength @ yield (PSI): 3,000 (ASTM D638)  
Flexural modulus (PSI): 200,000 (ASTM D790)  
Notched Izod (ft.-lbs./inch) @ 23°C: 2.5 (ASTM D256)  
Gardner Impact @ 23°C: 180 (ASTM D5420)

### Wind Load Testing

Negative wind load resistance (PSF): 129  
Rate conversion (MPH): 232  
Requirements to pass (MPH): 110  
ASTM method: D5206  
Design Pressure values and MPH values per ASTM D7254-07.

### Fire Safety

When polymeric materials are exposed to considerable heat or flame, the material will soften, melt or burn. Utilization of polypropylene Shakes in a given construction type and occupancy rating requires compliance with sections of the International Building Code. All materials should be chosen and installed in accordance with federal, state and local fire regulations and building codes.

### ASTM E-84

Flame spread index: 165  
Smoke density index: 385

## COMPLETE THE PICTURE WITH FINISHING ELEMENTS™

Accessories like corner posts and soffit are essential to any vinyl siding installation. But adding elements like shakes, beaded porch panel and board & batten can take your home's exterior design up a notch.

**Shakes** are panels with the look of hand-cut cedar

**Beaded porch panel** provides an authentic look to porch soffit

**Board & Batten** offers a timeless look for traditional and contemporary homes

**Accessories** complement any vinyl siding installation

## THE PROS TRUST VYTEC

When it comes to the products they sell, your contractors make their choices as carefully as you would. That's why they choose vinyl siding from Vytec. We stand behind the products we make. Continued advancements make us a manufacturer you can rely on for innovative, high performing products. It's this dedication to our craft that makes Vytec a partner your contractor can trust – and one you can trust, too.
